

BioStar Air

Zero on-prem. All-in on cloud.

Cloud-first access control built around the world's most advanced biometric technology.

Designed for organizations with one location or hundreds of sites, BioStar Air helps businesses secure their people, simplify administration, and scale without complexity.

FIRE & SECURITY MATTERS AWARDS

The only access control solution that natively connects the world's most advanced biometric readers to the cloud.

Cloud Biometrics. Done right.

Get cloud-native biometric access built into the platform, not bolted on afterward. Enroll once and use one secure identity across your company's locations.

Hybrid edge. Real-world ready.

Choose the deployment that fits your site. Go live in minutes with our simple one-cable installation, or retrofit your controllers with a drop-in upgrade to BioStar Air.

Flexible control. Protected Data.

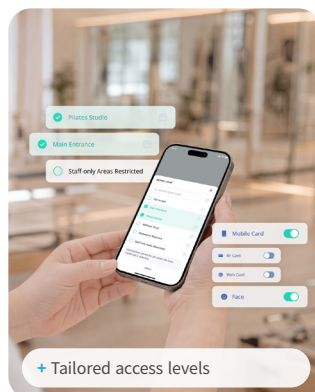

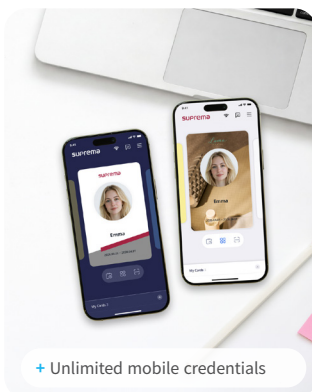

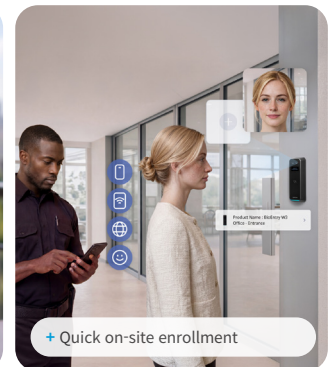

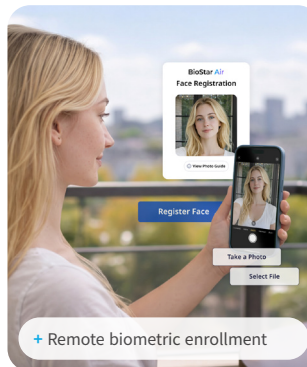

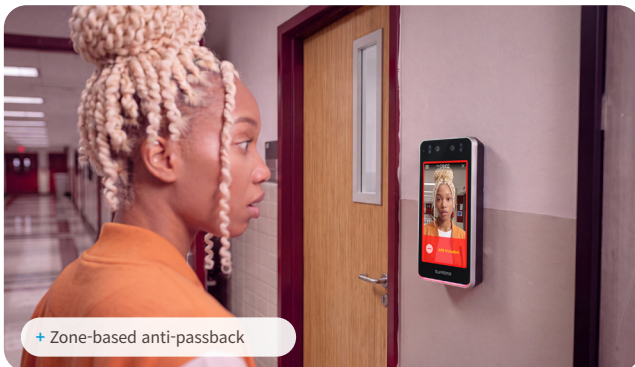

Manage everything yourself with BioStar Air's powerful yet simple tools on your phone or browser, or let the experts handle everything. Either way, you control your data.

Elastic scalability. Global consistency.

Scale across sites without while keeping users, credentials, policies, and configurations aligned. BioStar Air is the flexible solution that scales from a single door to a sprawling global multi-branch operation.

Get the highlights.

Backed by Suprema's global security, privacy, and compliance framework.

Effortless access control, from anywhere.

With BioStar Air, you stay in control. Set up and manage sites, enroll users, and define access levels yourself or securely delegate to your service provider. All from one cloud platform with a modern, intuitive interface designed to stay clear and easy to use.

All your spaces, at your fingertips, from your desktop or phone.

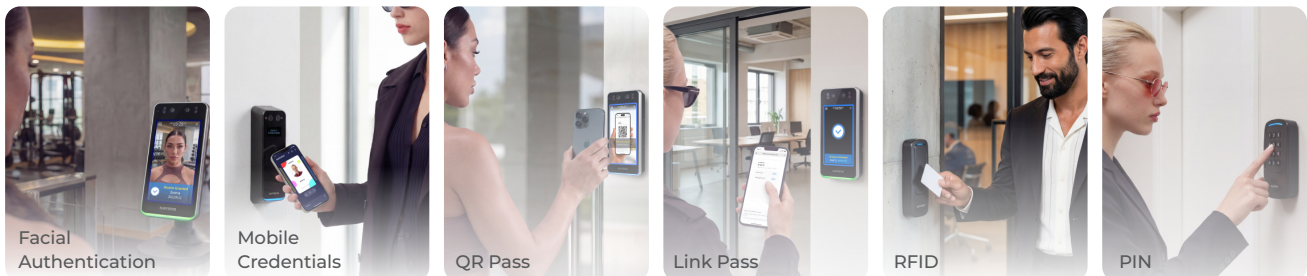

Central cloud dashboard

- Users & groups
- Access readers & cameras
- Doors & groups
- Schedules & access levels
- Elevators & floors
- Monitoring & logs

One identity, multiple credentials.

Create, send, and revoke all kinds of credentials remotely. No site visit required to add cards, faces, or QR. Empower your organization with the right access mix. Credential support varies by reader.

- Facial Authentication
- Mobile Credentials
- QR Pass
- Link Pass
- RFID
- PIN

Access that moves with you.

Use the same identity across sites with centralized sync and flexible credential models. Ideal for global companies and distributed sites.

Multi-branch credentials keep one user identity and one credential valid across locations. Global teams can access any office without re-issuing or managing separate credentials per site.

Multi-credential allows one user to hold multiple credential types in the same site, using face for high-security areas and mobile or PIN for everyday doors

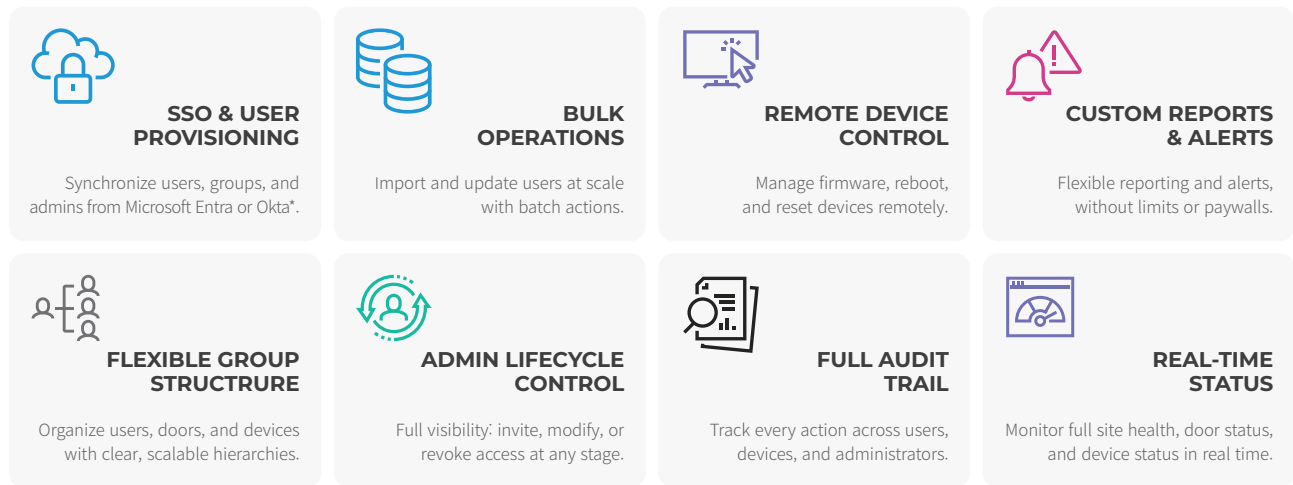

Multi-tenant credentials give each tenant private access control while keeping shared spaces seamless, so lobbies, elevators, and common areas stay accessible without compromising separation.

Grow. Without chaos

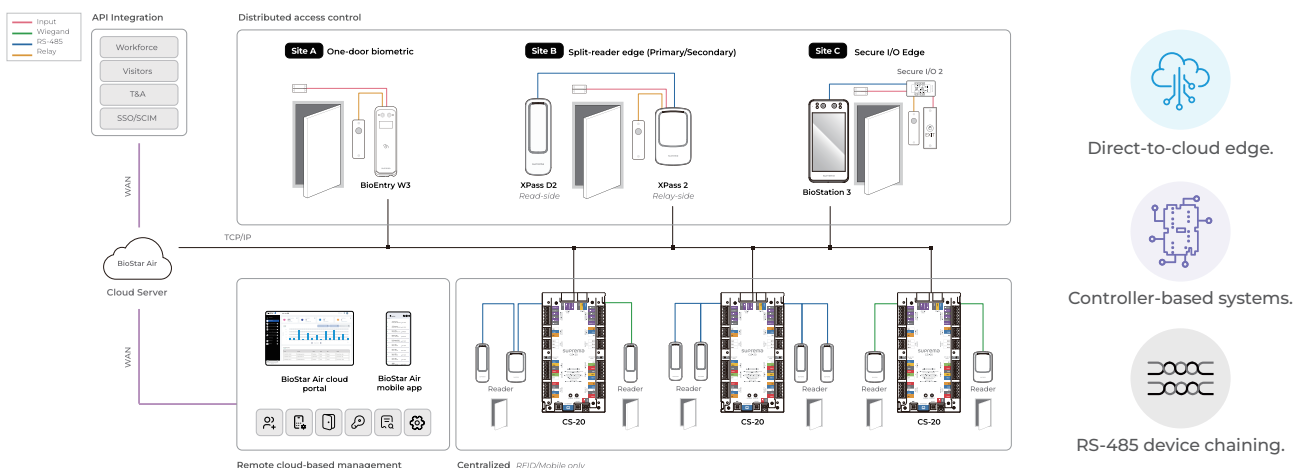

Complex security shouldn't require complex configuration. BioStar Air combines intuitive UX with deep control to help large systems stay organized, easy to manage, and lower risk as they grow.

*Identity-provider integration requires an additional license.

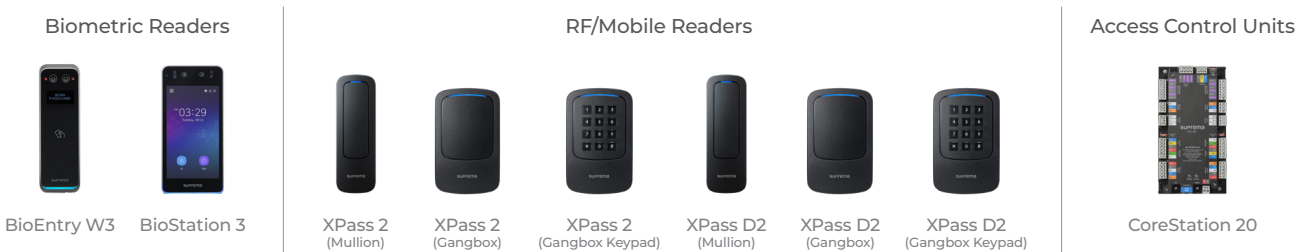

Hybrid edge. Built for the real world.

BioStar Air combines edge intelligence with flexible architecture, from direct-to-cloud deployment to controller-based systems with RS-485 expansion for larger environments.

Compatible Access Readers.
