Safety instructions

Observe the following instructions to use the product safely and prevent any risk of injury or property damage.

Warning

Noncompliance of instructions could lead to serious injury or death.

Installation

Do not install the product in a place with direct sunlight, moisture, dust, or soot.

- A fire or electric shock may occur.

Do not install the product in a place with heat from an electric heater.

- A fire or electric shock may occur due to overheating.

Install the product in a dry place.

- Otherwise, a product damage or electric shock may occur due to moisture.

Install the product in a place with no electromagnetic interference.

- Otherwise, a product damage or electric shock may occur.

The user should not install or repair the product independently.

- A fire, electric shock, or personal injury may occur.
- If the product has been damaged due to independent installation or repair of the product by the user, free A/S service will not be provided.

Operation

Do not allow liquids such as water, beverages, or chemicals get into the product.

- A fire, electric shock, or product damage may occur.

Caution

Noncompliance of instructions could lead to minor injury or product damage.

Installation

Do not install the power supply cable in a place where people pass by.

- Product damage or physical injury may occur.

Do not install the product near a highly magnetic object such as a magnet, TV, (especially CRT) monitor, or speaker.

- A product failure may occur.

Operation

Do not drop the product or apply an impact to the product.

- A product failure may occur.

Manage the password with care not to disclose it to others and change the password periodically.

- Otherwise, illegal intrusion may occur.

Do not press the buttons on the product forcibly or using a sharp tool.

- A product failure may occur.

When cleaning the product, wipe the product with a soft and dry cloth and no water, benzene or alcohol.

- Otherwise, a product failure may occur.

Introduction

Suprema Thermal Camera with FaceStation 2 measures skin temperature of users passing the access point and limit the access of users with higher temperature than preset threshold. FaceStation 2 sets the region for temperature measurement from where Suprema Thermal Camera detects the highest value point.

This document describes how to install the FaceStation 2 and Suprema Thermal Camera in combination.

Components

Suprema Thermal Camera

- Suprema Thermal Camera Module
- USB Cable
- Bracket

Bracket Fixing Screw x4

PVC Anchor x2

Fixing Screw x2

NOTE

- FaceStation 2 is sold separately. For more details, visit the Suprema website (www.supremainc.com) and refer to the user manual.

Installation

Installing Suprema Thermal Camera on a previously installed FaceStation 2

2

- 1** Loosen the bracket fixing screw to separate the FaceStation 2 and the bracket.

- 2** Loosen the fixing screws to separate the bracket from the wall.

- 3** Fix the thermal camera module bracket firmly using fixing screws to the position where FaceStation 2 will be installed.

NOTE

- If installing FaceStation 2 on a concrete wall, drill holes, insert PVC anchors, and fix them with fixing screws.
- Install Suprema Thermal Camera in a stable ambient temperature environment that is not subject to bright lights in the camera's field of view. Suprema Thermal Camera may detect objects other than the intended subject if they are in the field of view of the camera, so the presence of other objects especially with elevated temperatures should be avoided.
- The device may be affected by the surrounding environment, such as sunlight, wind, or ambient temperature fluctuations. This may cause variations between the temperature measured by the device and actual skin temperature of the user.
- Warm up Suprema Thermal Camera for more than 90 minutes after turning it on for self-calibration.

- 4** Fasten the thermal camera module bracket with the FaceStation 2 bracket by using bracket fixing screws contained in the package.

- 5** Install FaceStation 2 onto the fixed bracket.

- 6** Connect FaceStation 2 to the bracket by rotating the product fixing screw of FaceStation 2.

- 7** Connect the USB cable of the module to the connector of FaceStation 2.

Installing Suprema Thermal Camera on a new FaceStation 2

- 1 Determine the correct position to install the product using the provided drilling template.

NOTE

- The optimal height for installing device is 110 cm.
- Install the device where it does not reach the direct sunlight.
- Adjust the installation position so that the face is not exposed to direct sunlight when a user tries to authenticate.
- Install Suprema Thermal Camera in a stable ambient temperature environment that is not subject to bright lights in the camera's field of view. Suprema Thermal Camera may detect objects other than the intended subject if they are in the field of view of the camera, so the presence of other objects especially with elevated temperatures should be avoided.
- The device may be affected by the surrounding environment, such as sunlight, wind, or ambient temperature fluctuations. This may cause variations between the temperature measured by the device and actual skin temperature of the user.
- Warm up Suprema Thermal Camera for more than 90 minutes after turning it on for self-calibration.

- 2 Fix the thermal camera module bracket firmly using fixing screws to the position where FaceStation 2 will be installed.

NOTE

- If installing FaceStation 2 on a concrete wall, drill holes, insert PVC anchors, and fix them with fixing screws.
- To avoid RF interference, a minimum separation distance must be maintained.

Wall

Wall thickness	Distance
100 mm	283 mm
120 mm	275 mm
150 mm	260 mm

- 3** Fasten the thermal camera module bracket with the FaceStation 2 bracket by using bracket fixing screws contained in the package.

- 4 Install FaceStation 2 onto the fixed bracket.

- 5 Connect FaceStation 2 to the bracket by rotating the product fixing screw of FaceStation 2.

- 6 Connect the USB cable of the module to the connector of FaceStation 2.

NOTE

- To learn how to wire the FaceStation 2, visit the Suprema website (www.supremainc.com) and refer to the user manual.
- For more information, contact the Suprema technical support team (support.supremainc.com).

Settings

You can set up Suprema Thermal Camera in Device menu of FaceStation 2.

NOTE

- Suprema Thermal Camera can be used with FaceStation 2 firmware 1.3.2 or above.

- 1 Press  and authenticate with the Admin level credential.
- 2 Press **Device > Thermal Camera**.
- 3 Change the desired item.

- **Thermal Camera:** Use Suprema Thermal Camera on FaceStation 2.
- **Check Temperature Mode:** Set the check temperature mode depending on the desired usage.
 - **Authenticate Before Temperature Check:** Measure the skin temperature after a successful authentication.
 - **Authenticate After Temperature Check:** Authenticate only when the user is within the range of the preset temperature threshold. When this mode is activated, it does not attempt to authenticate user's identity if their temperature has been detected to be above the threshold.
 - **Check Temperature Only:** Detect skin temperature without authentication. This mode allows users within the range of the preset threshold to access without checking their identity or access rights.
- **Celsius/Fahrenheit:** Change the unit of temperature.
- **Threshold Temperature:** Set the threshold temperature to limit the access. Users with detected temperature over the threshold will be denied access.
- **Save Temperature Data:** Save temperature data. When this mode is enabled, it saves both authentication and temperature logs. When this mode is disabled, it only saves authentication logs.
- **Authentication Fail Sound:** Set the alerts to trigger when the skin temperature is higher than the preset threshold.
- **Show Thermal Infrared Image:** Display infrared imaging on the screen of FaceStation 2.
- **Camera Configuration:** Configure the Suprema Thermal Camera settings for accurate measurement.

NOTE

- It is recommended to maintain the default values of the camera configuration settings for the best performance. The default values of each option are as follows:
 - **Distance(cm):** 70
 - **Emission Rate:** 0.98
 - **ROI X(%):** 30
 - **ROI Y(%):** 40
 - **ROI Width(%):** 40
 - **ROI Height(%):** 20
- **Distance(cm):** Set up the distance between the user and device.
- **Emission Rate:** Set up the emissivity to precisely measure the temperature of the user.
- **ROI X(%), ROI Y(%), ROI Width(%), ROI Height(%):** If there are lights in the device field of view they may be detected instead of the desired subject. Set the temperature measurement area by adjusting the size and position of ROI (Region of Interest).

Product specifications*

Category	Feature	Specification
Thermal Module	Max. Resolution	120 × 160
	Frame Rate	25 fps
	NETD (Noise Equivalent Temperature Difference)	≤ 50 mK (@25°C, F# = 1.0)
	Field of View	37.2° × 50° (H × V)
Temperature Measurement	Temperature Range	30°C to 45°C (86°F to 113°F)
	Temperature Accuracy*	± 0.5°C (0.9°F)
	Temperature Distance	Adjustable, 40 cm–80 cm (15.7" to 31.5")
General	Dimension (W x H x D)	<ul style="list-style-type: none"> Camera: 77 mm x 46 mm x 22.2 mm (3.03" x 1.81" x 0.87") Camera with bracket: 139.84 mm x 163.8 mm x 22.8 mm (5.51" x 6.45" x 0.90")
	Interface	USB
	Operating Temperature	0°C to 50°C (32°F to 122°F)
	Storage Temperature	-40°C to 60°C (-40°F to 140°F)
	Operating Humidity	5% to 85%

* This document only provides the specifications of Suprema Thermal Camera. To check the specification of FaceStation 2, refer to the user manual.

* This accuracy rate is possible only when you use the device under the following conditions:

- 1) Warm up Suprema Thermal Camera for more than 90 minutes after turning it on for self-calibration.
- 2) Operate the device within the recommended ambient temperature range (10°C to 35°C or 50°F to 95°F).

Disclaimers

- The information in this manual is provided with regard to Suprema products.
- The right to use is acknowledged only for products included in the terms and conditions of the sales agreement guaranteed by Suprema. The right of license to other intellectual property rights not discussed in this manual is not acknowledged.
- Suprema does not guarantee or hold responsibility for the suitability and commerciality of the product for a specific purpose, or the infringement of patent, copyright, or other intellectual property rights with regard to sales or usage of Suprema products.
- Do not use a Suprema product in situations related to medical, rescue of human lives, or maintenance of life, as a person may be injured or killed due to product malfunction. If an accident occurs while a consumer is using the product under the situations described as examples above, employees, subsidiaries, branches, affiliated companies, and distributors of Suprema do not accept responsibility, nor will they be liable for all related direct and indirect expenses or expenditures, including attorney fees, even if the consumer has discovered shortcomings in the product design or manufacturing process and claims this as a significant fault.
- Suprema may modify the product size and specifications at any time without proper notice in order to improve the safety, function, and design of the product. Designers must keep in mind that functions or descriptions indicated as "to be implemented" or "undefined" may change at any time. Suprema will implement or define such functions or descriptions in the near future, and Suprema accepts no responsibility for compatibility issues and any other problems arising from such compatibility issues.
- Suprema products are not used to diagnose any medical conditions. Suprema thermal cameras can identify individuals with skin temperature higher than a preset figure but should not be solely or primarily relied upon to diagnose or exclude a diagnosis of COVID-19, or any other disease. Only a licensed medical professional can determine if a person with elevated skin temperature is symptomatic of a specific medical condition.
- If you wish to obtain the newest specifications before ordering the product, contact Suprema through a Sales Representative or local distributor of Suprema.
